Kuntai Hotel Beijing

The 22nd ISMST International Congress

The 22nd international medical shockwave conference will be held in Beijing, a city with more than 3000 years of history, on May 23-26 2019. The aims of this conference are boosting the innovation and research in medical shockwave field as well as encouraging the domestic and oversea academic exchanges. Meanwhile, the conference can provide a wonderful platform for the communication between researchers and clinicians coming all over the world, which may one step further promote the application of medical shockwave in multiply disciplines.

Conference rundown

May 23, 2019: ISMST Certification Course

CSMA Certification Course

May 24 - 26, 2019: Academic exchanges

In this conference, world-wide experts in medical shockwave realm will be invited and the up-to-date research achievements and successful experiences will be shared through speeches, group discussions, poster presentations and onsite demonstrations.
